

INFRASTRUCTURE OUTSOURCING

for life sciences

OUTSOURCE TO THE LIFE SCIENCES SPECIALIST

NNIT combines the power of life sciences experience, infrastructure expertise and GxP regulatory knowledge to deliver infrastructure outsourcing services that meet your challenges and spur new levels of growth.

With our infrastructure outsourcing services, clients get continuous technology renewal, scalability, superior data quality and compliant infrastructure from a provider that understands GxP.

NNIT solutions free up valuable resources for clients so they can better focus on business development and digital transformation of their business.

LIFE SCIENCES EXPERIENCE

NNIT began as a part of a major pharmaceutical company over 20 years ago. The life sciences are integral to our DNA.

INFRASTRUCTURE EXPERTISE

NNIT applies our expertise to keep clients at the leading edge of standardization, shared services, stability, predicability and cost efficiency.

DEEP GXP REGULATORY KNOWLEDGE

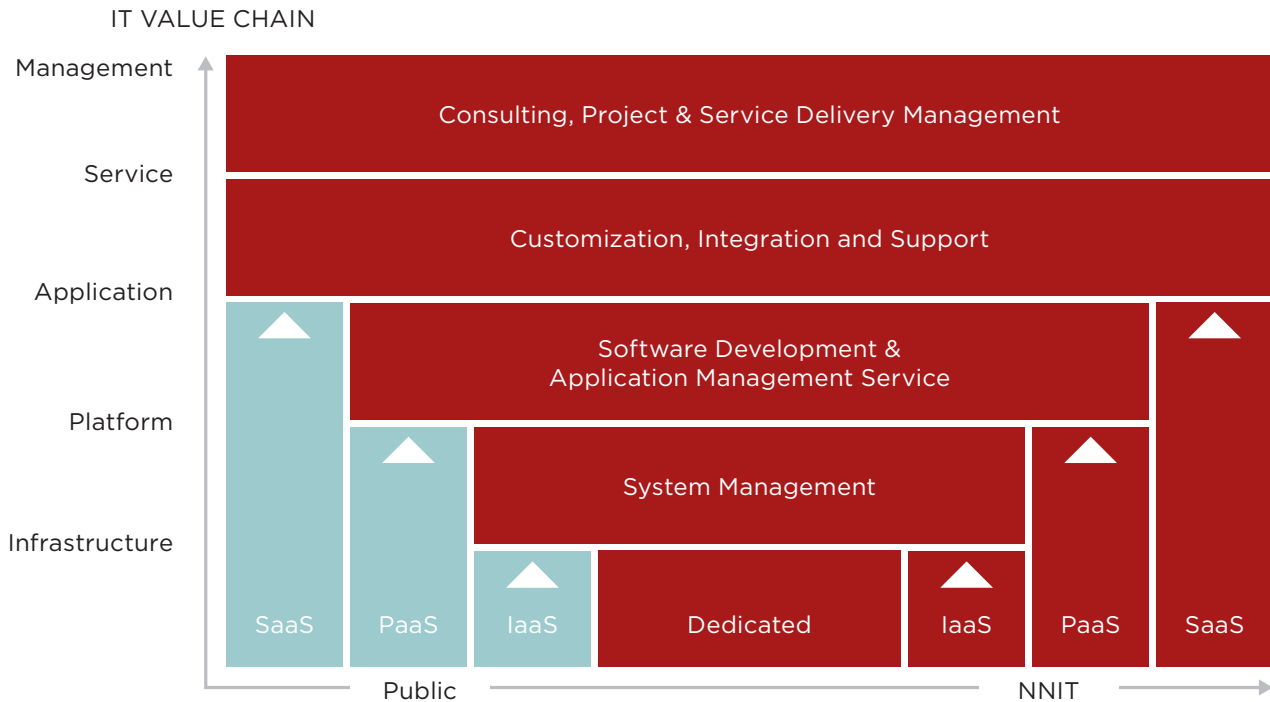

We know the regulatory challenges life sciences companies face – and have solutions to keep you compliant. Our expertise spans the life sciences value chain.

Our infrastructure outsourcing services are trusted by large and medium sized companies alike to manage infrastructure activities across the life sciences value chain.

INFRASTRUCTURE OUTSOURCING - YOUR WAY

NNIT is flexible. We offer you a choice of cloud-based or traditional hosting services in our data center. Or you can opt for remote management of your infrastructure whether it is housed in your own data center, or with a third party data center.

NNIT's infrastructure outsourcing delivers the benefits of scalability, flexibility and availability to meet your business needs.

NNIT offers a wide array of outsourcing hosting services, both traditional and cloud-based.

HIGHLY SCALABLE AND SECURE INFRASTRUCTURE SERVICES

At NNIT, we guarantee that your data and applications are operated and maintained in an environment that is secure and always ready for regulatory inspection. We run our operations in a state-of-the-art data fortress that meets strict European requirements for security, availability, and compliance.

Our GxP cloud is fully validated and regulatory compliant as per Eudralex, Volume 4, Annex 11 and FDA's 21 CFR Part 11. In addition, our governance and operation models are based on ITIL, and tailored to optimize our different services.

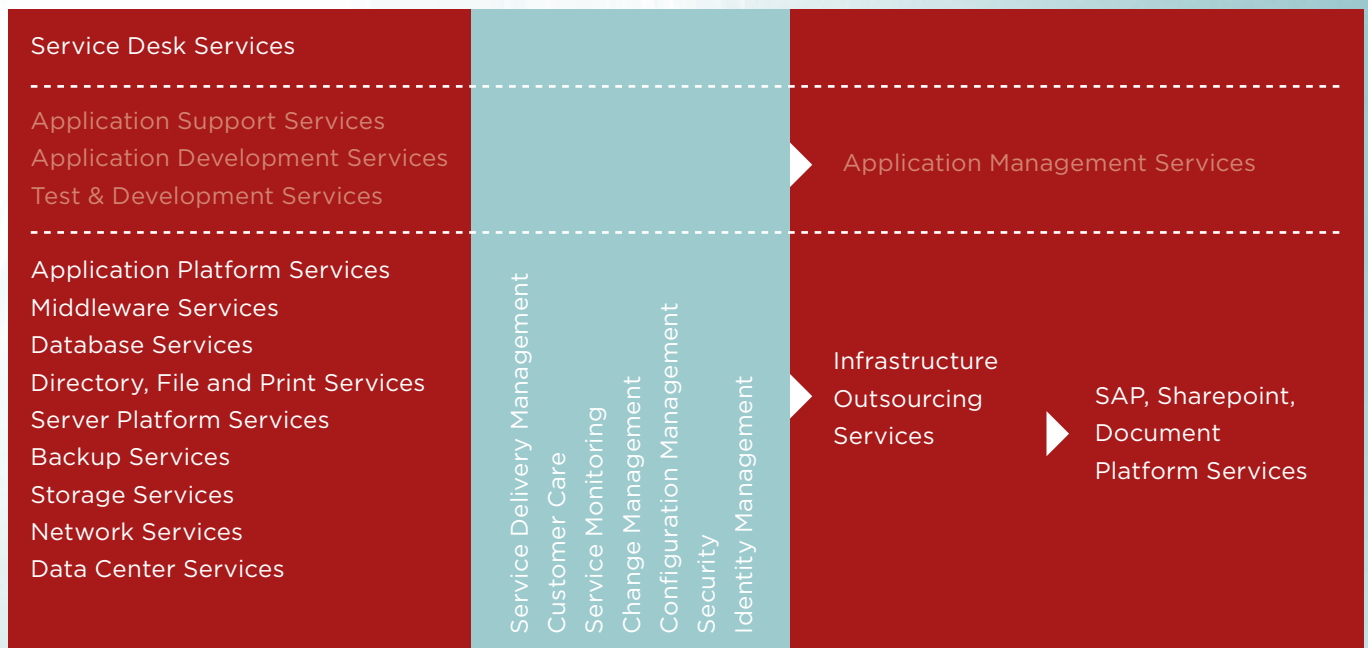

NNIT has unmatched experience in deploying, transitioning and operating IT infrastructures. We manage deliveries that include the entire stack as well as selected infrastructure services.

REDUCE COST

NNIT infrastructure outsourcing helps you significantly reduce capital intensive investments while significantly containing overhead costs in management and maintenance.

We also give you a simple, pay-per-use pricing approach backed by the security, compliance and full data control demanded by life science companies today.

THE SCOPE OF NNIT INFRASTRUCTURE SERVICES

Our infrastructure outsourcing services enable companies to run lean and to be fast and global while wisely controlling their IT spend.

NNIT INFRASTRUCTURE OUTSOURCING SERVICES

It may seem like a paradox, but our Global Delivery Model is based on our obsession with staying close to our customers.

We don't just listen to customers. We embrace them as partners in achieving mutual success. We ensure smooth and safe transition of services to NNIT in accordance with proven methodologies. We also assign Service Delivery Managers and Architects to your site whenever necessary and build teams with the right skills and expertise to take collaboration and service to entirely new levels.

NNIT has affiliates around the world with offshore centers and local offices, and offer the security and flexibility of working with a local IT partner.

You can depend on 24/7 fast response support as well as on-shore, near-shore and offshore options. Besides our own data center, we work with external data center partners.

By offering a wide range of dedicated services, partners, and support options easily available, we make sure you can focus on making your business a success.

OUR GLOBAL APPROACH IS ALWAYS NEARBY

Our global approach is always nearby.

NNIT OUTSOURCING IN THE LIFE SCIENCES

HELPING LIFE SCIENCE COMPANIES MEET BUSINESS CHALLENGES THROUGH OUTSOURCING

NNIT outsourcing services for applications and infrastructure help life science companies solve their biggest IT and compliance challenges.

We've been involved in the life science for over 20 years. Since then, our services have evolved to help clients ensure continuous technology renewal and GxP regulatory compliance while significantly improving cost efficiency, agility and scalability.

For leaders in the industry, outsourcing activities not core to their business is an attractive strategy. When NNIT does the heavy lifting, you can better focus on the issues critical to growth.
