

# Apply for the NNIT Graduate Program

The journey begins on September 1, 2021.

At NNIT, we believe that digital transformation is all about solving real problems for real people. If you are passionate and curious about IT and you want to make your mark and improve business, processes and even life and society through technology...

**... The NNIT Graduate Program could be a perfect opportunity for you.**

## **You'll get 18 months of solid experience**

The program offers three modules of six months each within different specialist and/or technology areas. This way, you'll gain a broad range of practical know-how and experience in short time.

We promise you a steep and inspiring learning curve. - You'll work on projects alongside NNIT's many highly skilled specialists and consultants on customer projects. And you will get the opportunity to develop your passion for bringing digital transformation to life.

In NNIT we care about developing you as a specialist as well as your technical skills. But being part of NNIT also means growing personally, as we offer courses in personal development as well as selected training and certifications that match your abilities and ambitions. This way, you'll get a clearer sense of how you can best apply your potential in the future.

## **Impact your own career through a program tailored to you**

You choose three different NNIT departments for your modules. You may be strongly passionate about a specific IT area or technology.

Or you may be more of a generalist with an IT or life sciences education. Whichever is suitable for the NNIT Graduate Program.

To support your development, you'll be assigned a Manager from the line of business, a personal Mentor, and a Graduate Manager to coach and guide you.

After completing the NNIT Graduate Program, you'll be offered a position to continue working in NNIT. There are many different job options, but the goal is to give you a significant role in impacting and driving the digital transformation with our customers and in NNIT. Your future role would fall into categories such as IT specialist or business consultant.

## **Your qualifications**

A Master's degree within IT and/or life sciences completed in 2021. Or perhaps you graduated in 2020.

Maybe you've already gained experience within areas such as Cloud, Data & AI, Cybersecurity or IT for Life Sciences. But most importantly, you are passionate about your work, you can think independently, and you believe strongly in the power of working together as a team. You have an advisory mindset and thrive on delivering high quality.

## How to apply

- Submit your application, CV and grades. If you have not finished your Master's yet, please upload your latest grades.
- Please upload a basic video presentation (1-2 minutes) stating your motivation for applying for the program and why NNIT should choose you for the Graduate Program.

## Application deadline and interviews

- Application deadline is March 21.
- First interviews will take place in week 14 .

# Apply today and start your professional journey at NNIT

## About NNIT

### Together we make a mark in business and society; bringing digital transformation to life

At NNIT we are dedicated to help you improve businesses, and we attract people who are wired to make a mark and improve business and society through technology.

As a trusted partner, we work with passion to deliver results and continuously explore new ways of adding value.

Today, IT influences every part of society, and our pioneer spirit is stronger than ever as new behaviors and technologies offer a range of opportunities.

We firmly believe that when driven by conscience and the pursuit of excellence, IT enables us to reach goals that may first seem impossible and can fundamentally change business and society for the better.

We are more than digital experts. We are enablers, committed to help you reap your full potential. No matter what opportunities you are looking to realize, our role is to help you foster innovation and make the mark you and we aspire to.
